Current Report CR No 17 – Information on the Results Achieved by the Issuer in the 3rd quarter of 2026

In connection with the Individual Reporting Standards adopted by Stalprodukt S.A. ('Issuer', 'Company'), the Company's Management Board, hereby, discloses to the public the information on the results achieved by the Stalprodukt Group in the 3rd quarter of 2026, which shows some significant deviations from the average figures achieved in the analogical periods in the recent 2 years. The criterion of materiality adopted by the Company stands for the deviation of +/- 25 % in relation to the base value (i.e., compared to the average results from the third quarters of 2024 and 2025):

Significant changes in the average values over the last 2 years have occurred for the following items:

1. Consolidated operating result (operating loss), which for the 3rd quarter of 2026 amounted to PLN 35,955 thousand.
2. Consolidated net result (loss), which for the 3rd quarter of 2025 amounted to PLN 29,992 thousand

The performance of the Stalprodukt Group in the third quarter of 2026 was significantly influenced by the situation in the Zinc Segment, which recorded an increase in revenue compared to the established baseline. The results achieved by the Group reflect varying conditions across its individual business segments; Electrical Steel Segment, in particular, continued to face challenging market conditions, driven largely by competitive pressure from producers outside the European Union and the high costs of manufacturing within the European market.

The Company's Management Board also emphasizes that the data provided above has been prepared as part of the consolidation process and remains preliminary.

The consolidated quarterly report for the third quarter of 2026 will be made public in accordance with the schedule for the submission of periodic reports in 2026, as previously announced by the Issuer in a relevant current report.
